DETAILED ACTION

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-15, 20, 21 and 24-31 rejected under 35 U.S.C. 102(b) as being clearly anticipated by Dooley (US 3,893,440). The FIG. 6 embodiment has a housing 30 and valve body 50 as claimed and includes a pressure sensitive closure formed by ball 88 and spring 92.

Claims 1-10, 14, 15, 18, 19, 21 and 24-27 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Tuckey (US 3,782354). As shown in FIG. 2, the compression relief valve has a housing 20 and valve body 30 as claimed and includes a biasing spring 42.

Application/Control Number: 10/668,366

Art Unit: 3747

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

the prior art are such that the subject matter as a whole would have been obvious at the time the

invention was made to a person having ordinary skill in the art to which said subject matter pertains.

Patentability shall not be negatived by the manner in which the invention was made.

Claims 22 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Tuckey (US 3,782354) in view of Peters (US 2,742,380). Tuckey discloses the claimed

invention as stated above except for the induction passageway arrangement. Peters teaches

that it is known to construct an engine with a decompression venting passage communicating

with an induction passage 9, which is at least partially formed in the cylinder housing. It would

have been obvious to one having ordinary skill in the art at the time the invention was made to

modify the engine of Tuckey decompression venting passage communicating with an induction

passage and/or an induction passage at least partially formed in the cylinder housing, as taught

by Peters, in order to return vented fuel/air mixture to the engine and/or provide a structure to

supply fuel/air mixture to the engine.

Allowable Subject Matter

Claims 16 and 17 are objected to as being dependent upon a rejected base claim, but

would be allowable if rewritten in independent form including all of the limitations of the base

claim and any intervening claims.
